Where To Download Chemistry Packet **Answers**

A phase change is when a material changes from one state of matter to another. This does NOT rearrange the molecules of the substance, so we call this a physical change, rather than a chemical change. For example, water vapour, liquid water and ice are all made of H₂O molecules.

Phase Changes Gizmo Packet Key [PDF]

Phase changes

typically occur when

the temperature or

pressure of a system is

altered. When

temperature or

Where To Download Chemistry Packet Answers Phase Changes

pressure increases, molecules interact more with each other. When pressure increases or temperature decreases, it's easier for atoms and molecules to settle into a more rigid structure.
