Biogas production is an eco-friendly strategy for energy production from biomass and the residue can be used as a soil conditioner. Biogas is produced by the anaerobic biological breakdown of organic matter. It primarily consists of methane and carbon dioxide.

Soil Conditioner - an overview | ScienceDirect Topics

Soil conditioners - enhance soil properties and are often called soil enhancer. These products do alter the soil structure, but that is only part of the effect. Soil properties include many areas such as cation exchange capacity, soil ph, water holding capacity, or soil compaction. 0:59

What is Soil Conditioner? - Southland Organics

The .gov means it's official. Federal government websites always use a .gov or .mil domain. Before sharing sensitive information online, make sure you're on a .gov or .mil site by inspecting your browser's address (or "location") bar.

Publisher : Marcel Dekker, Inc. - NWISRL Publications

Soil conditioner is anything you mix into your soil in order to improve its structure. This can include things like manure, compost, peat moss, leaf mold, sawdust, straw, gypsum, or limestone. Conditioners can be organic or artificial. Fertilizer doesn't fall under the label of soil conditioner because it doesn't alter the soil's structure.
