Automatic and manual transmissions both require a coupling device, a piece of equipment that is used to connect and disconnect the transmission and the engine as needed. In a manual transmission, that piece is called a clutch, and in an automatic transmission, it's a torque converter. In order to swap your automatic transmission

Manual and automatic transmissions are the two most common vehicle transmission types in the U.S. Both types connect a vehicle's engine to its wheels to make the vehicle move. Every transmission features a gearbox containing a system of gears, and these gears alternate to provide different levels of power to the wheels according to

Moreover, manual-transmission models consume less fuel than automatic-transmission models. An automatic model has more parts, and this increases the overall weight of the bike. More weight means the engine has to make more power to propel the motorcycle, ultimately translating into higher fuel consumption. 2.
