### Oracle And Sql Server Bff

While Oracle and SQL Server may never be BFF, you can use these methods to access Oracle data from within SQL Server. Your data comes together, your customers are happy, and the world is a better place. And besides, if these two old rivals did become best friends, what would Oracle and SQL Server DBAs have to argue about?

### Oracle and SQL Server: BFF?

Oracle runs on a wide variety of platforms while the SQL server can install on the Windows server only. Oracle supports star query optimization while SQL server doesn't offer query optimization. In oracle, values do not change before commit whereas in SQL Server values are changed even before commit.

### Oracle Vs. SQL Server: Key Differences

Microsoft SQL Server Oracle; Microsoft SQL Server does not have a row-level locking feature. Microsoft SQL Server applies a page-level lock, which effectively locks all rows on the page, whenever any row in the page is being updated. This is an exclusive lock whenever the data is being changed by DML statements.
