So in reality there's a total of 5 speakers. Output power is 35 watts (2x10 to the outer speakers and 15 to the subwoofer). The sub can really move! This is a sealed, non-vented, non-ported boombox, which is surprising, given that TDK's smaller 2-speaker boombox has a big bass port. But don't worry, there's no unwanted vibration.

For someone looking for a on-the-go boombox, they might want to look at the 2 speaker boombox instead, as it is a lot lighter and smaller to carry around. Of course they won't get the same music reproduction, and thump as they would with the 3 speaker variant, but as far as boomboxes go, I think of a boombox as a means of having "portable speakers", rather than just "speakers".

### **Review of the TDK 3 Speaker Boombox | Totally Dubbed**

Under the hood, the TDK Three Speaker Boombox includes three 5.5-inch drivers: a 15-watt woofer at the center, flanked by two 10-watt stereo speakers with edge-driven tweeters at their center.
