The tense on a verb is also inflectional morphology. For many English verbs, the past tense is spelled with an -ed, (walked, cooked, climbed) but there are also many English verbs where the tense inflection is indicated with a change in the vowel of the verb (sang, wrote, ate).. English does not have a bound morpheme that indicates future tense, but many languages do.

This chapter deals with the provenance of literature as a concept, not so much with the literary past as with the past of 'literature'. A book written about literary historiography between 1660 and 1781 nowadays stands in need of a special dispensation on which to proceed, a dispensation to speak of literature as if the concept has meaningful existence prior to the point to which several ...

Old English (OE) exhibits word-order patterns which are reminiscent of the Verb Second (V2) phenomenon found in many modern Germanic languages. Thus, fronting of some constituent often leads to subject-verb inversion, to a word order in which the finite verb occurs in second position. This chapter addresses the question of why V2 was lost in the history of English.
