Basic Laser Printer Maintenance And

Laser Printer. How They Work: Laser printers use static electricity to apply a fine powder – called toner – to the page. Because this process occurs rapidly, laser printers typically print far more quickly than inkjet devices do. Available in either color or monochrome laser printers, either allow you to swiftly print a wide range of documents.

Printer Buying Guide - Office Depot

A light-emitting diode (LED) is a semiconductor light source that emits light when current flows through it. Electrons in the semiconductor recombine with electron holes, releasing energy in the form of photons. The color of the light (corresponding to the energy of the photons) is determined by the energy required for electrons to cross the band gap of the semiconductor.

Light-emitting diode - Wikipedia

SP 8400DN Black and White Laser Printer | Ricoh USA

1. Duplex (2-sided) printing and scanning work perfectly. Page scanning and printing is fast as expected from a laser printer.
2. Print and scan quality is indistinguishable from originals including color documents. This is not a photo print quality printer. However, color documents are excellent.
3. The machine is fairly quiet.
