An ERP implementation is one of the most important projects a company can undertake. There are many variables associated with making the project a success and realizing the desired ROI. One of the most critical factors is the ERP project team roles and responsibilities of those selected to participate in the project.

### ERP Project Team Roles and Responsibilities

An ERP implementation involves installing the software, moving your financial data over to the new system, configuring your users and processes, and training your users on the software. Choosing the right partner for implementing your ERP system is almost as important as selecting the right software in the first place.
