Metallurgy deals with the process of

purification of metals and the formation of alloys. Copper Flash Smelting Process. Principles of Metallurgy: The metallurgical process can be classified as the following: 1. Crushing and grinding: The first process in metallurgy is crushing of ores into a fine powder in a crusher or ball mill. This process ...

Metallurgy - Definition, Principles & Examples

Metallurgy - Metallurgy - Testing mechanical properties: The most common mechanical properties are yield stress, elongation, hardness, and toughness. The first two are measured in a tensile test, where a sample is loaded until it begins to undergo plastic strain (i.e., strain that is not recovered when the sample is unloaded). This stress is called the yield stress. It is a property that is ...
