Space order means writing about objects in the order of where they are located. When you are writing a description of how something looks, or how to go somewhere, you need to use space order. For example, you can describe something from the top to the bottom, from the nearest point to the farthest point, from the right side to the left side.

Space planning is an essential step in the interior design process. Without proper space planning, you risk creating a design that is not optimal and that doesn't work well for your client. The key to a successful design job starts with determining the purpose of the space being designed.

Space Planning 101: How to Design Efficient Spaces

Effective space planning necessitates careful consideration of the principles of design - harmony, emphasis, rhythm, balance and scale - in order to create effective and aesthetically pleasing interiors. The scale and proportion of interiors should always be related to the scale and proportions of the human frame. 12.
