Chemistry Lab The Periodic Law Answer Key

The Periodic Law . In 1869, Dmitri Mendeleev and Lothar Meyer individually came up with their own periodic law "when the elements are arranged in order of increasing atomic mass, certain sets of properties recur periodically." Meyer based his laws on the atomic volume (the atomic mass of an element divided by the density of its solid form), this property is called Molar volume.

The Periodic Law - Chemistry LibreTexts

Answer KEY Post-Lab Questions (Answer in your lab journal.) 1. Mendeleev's Periodic Law can be stated: "The physical and chemical properties of elements are periodic functions of their atomic masses." Looking at your arrangement of the element cards, describe in your own words what the term "periodic function" means.

Answer KEY - Studylib

In accordance with this modification, the periodic law states that the properties of the elements are periodic functions of their atomic number. Each known element possesses a complete set of properties that fully characterizes it and distinguishes it from all other elements.
