This shifts the graph
DOWN p units. A
point (a, b) on
the graph of $y = f(x)$
moves to a
point $(a, b - p)$
on the graph of $y = f(x) - p$.
This transformation
type (shifting up and
down) is formally
called vertical
translation.

Shifting Graphs Up/Down/Left/Right - Tree of Math

Here are some simple things we can do to move or scale it on the graph: We can move it up or down by adding a constant to the y-

value: $g(x) = x^2 + C$.

Note: to move the line down, we use a negative value for C. $C > 0$ moves it up; $C < 0$ moves it down We can move it left or right by

Translate x units to the
left or the right or
three units up or down.
You'll sometimes see it
like this, but just
recognize this is just
saying just take your x
and subtract five from
it, which means move
five to the left. And this
